

LP 3994

Based on the Capacitive Technology, with dedicated electronics.

Category : Capacitive Touch Module
Model : LP 3994
Application: Medical Industry, Home Automation.
Layout : Standard or Customized
Overlay Material: Acrylic

Specification

Interface/Protocol : I2C
Number of Key : 17 key
Thickness : 3.5mm
Backlight Color : White
Supply Voltage : 3.3V DC
Communication Speed : 100 Kbps

Feature

- Advanced Human-Machine Interface Design with 17 Capacitive Keys with White Backlight
- No False Touch Detection and Accurately Detects
- Appealing appearance with strong Graphic Clarity
- PCB Based with Dynamic Design and Layout
- AEC qualified for stress resistance
- Waterproof Touch keypad with IP65 Protection
- Dust Proof, Anti-Interference and Vandalism proof,
- Which make it a good choice for public use or harsh environment
- Excellent Durability
- Robust, Excellent Sensitivity, Low Cost, and Many More.

Applications

Medical Industry, Industrial Automation.
